

CODE-S FOUNDATION COMPUTER TRAINING 2019

WEB DEVELOPMENT

INSTRUCTOR: WILLIAM O. AGYAPONG

PRACTICAL ASSIGNMENT 4

July 5, 2019

INSTRUCTIONS:

- Create a website for XYZ Company Limited. **For convenience, you are to choose your own product line, services, logo, company name and all other details relating to the company in question.**
- Each web page must begin with the company name and/or logo and must also have navigation bar with links to all other web pages (i.e. for instance, a user on say products page should see links to the home page, about us page, services page and contact us page) for easy accessibility
- You are to zip the folder containing your html files, css files and images
- Send the zipped file to the address, codesfoundation18@gmail.com, latest by Saturday, July 6, 2019 12.59pm
- The title of the email message should be "Web dev 19 Assignment 4"
- Please include your full name and contact in the body of your message

Note: *This assignment is part of a series of assignments and class activities which will culminate in your final project. For assignment 4, you are required to develop only the home page for the company in question. The structure of the home page should look like the final example given in the video (css crash course for absolute beginners).*

XYZ Company Limited deals in the sales of products and the provision of services. The company requires a website for its operations with the following specifications:

1. A home page which will display information such as
 - Name and/or logo of the company
 - Navigation menu with links leading to **About Us** page, **Products** page, **Services** page and **Contact Us** page
 - A banner section with appropriate background image and a text on top saying something nice about the company. This must follow immediately after the navigation bar
 - At least one flagship (main) product with image(s) and brief description.
 - Footer showing useful links (e.g. Facebook, Instagram, Twitter, etc.) and a copyright notice (e.g. 2018 All Rights Reserved, XYZ company.com)
2. Features on other pages
 - I. **About Us page:** A brief history, mission statement, core values, and a profile of some key management members (at least two)
 - II. **Products page:** A lists of products organized in columns to display name, image, price and quantity available.
 - III. **Services page:** A list of all services provided and some image(s) of work(s) done for clients.
 - IV. **Contact Us page:**
 - Location, postal address, telephone and email address
 - "Leave a comment" section for users to leave comments.
3. Administrator dashboard area for general site settings, products and services management

Don't give in to intimidation. Strive hard to do the best you can.

Happy coding!
